

What's New for 2016-2017

- 1. Browser support** – the system is optimized for Google Chrome, however, other common browsers such as Internet Explorer, Mozilla Firefox and Safari are may also be used.
- 2. Certificates** - Certificates are redesigned to include all certifications on a single certificate by series.

- 3. Rosters and test assignment** - The process for creating rosters and assigning tests has changed to improve response time and throughput, especially during peak periods.
- 4. On-screen help** - instructions and tips are incorporated into the roster creation and test assignment screens.
- 5. Pretesting** – the pretest designation, previously available only in the Fall test window has been eliminated. Students are eligible to attempt each test title in a series once during the Fall test window and again in the Spring test window, for a single price.
